

The Astrology of 2025 +

Camille Albrecht and Denise Hall

Hello to you all. My name is Jan Clayton and I will be your host for today. The Julian Teachings organization welcomes you to **The Astrology of 2025+**. This presentation is one of a number of pop-ups that we host each year presented by members of our community. Our pop-ups highlight the work of many of June/Julian's students who are themselves master metaphysicians. Let me tell you a little about our organization.

The mission of Julian Teachings is to encourage spiritual development and increase the awareness of individuals by enabling access to the rich and extensive metaphysical teachings of the late Reverend June K. Burke and the Seraph Julian. Our goal is not only to provide accessibility to these teachings but also to provide a structure for sharing metaphysical information and techniques, and to encourage our members to network with one another.

Now on to the logistics. Our presenters today would prefer not to take questions during the presentation; however, they will have a Q&A session at the end. If you have a question during the presentation, please feel free to put it in the chat discussion. I will be monitoring your questions, and if something critical comes up, I will ask the question for you at an opportune moment.

We are recording this presentation, and links to both video and audio recordings will be available within a few days:

- If you receive the Julian Teachings Community eBlasts, you will get the links in your email.
- The links will also be available at

- <https://julianteachings.com/pop-up-resources/> .
- If neither of these options works well for you, please put your email address in the chat area and I will send you the links when they are available.

It is now my pleasure to introduce our two speakers, Camille Albrecht and Denise Hall.

- Camille Albrecht has over 40 years of experience as a professional astrologer, a tarot practitioner, a kabbalist, and a channel for master teachers, angels, and guides. Her work includes communicating with loved ones who have crossed over to the inner plane and exploring life after death. Camille offers personal and group sessions. She teaches the June/Julian Self-development and Practical Magus courses. She also teaches classes on astrology, the tarot, and metaphysics. In addition, she serves as the president of Julian Teachings, Inc.
- Denise Hall has been involved in the Julian Community for over 40 years as both a student and teacher. She has completed the Transition Energies and Mystical Magus studies with Julian & Sam Holland. She continues to study with Sam Holland & Temier in Pathways & Ancient Magus classes, and with Saul Srour studying the Self-development material. Denise is a Reiki Master and an astrologer. She has been teaching a beginning astrology class for over a year now and plans to start a second Astrology class this spring. If you are interested in participating, please let her know.

It is time to hand this pop-up over to our presenters. Camille?

**Planets are the delivery system for the
universal energies of evolution**

Thank you, Jan. Hello and welcome to everyone. I'm glad you've joined us today. Denise and I have lots to share about the upcoming planetary changes.

And why do we look at the planets? Because astrology is a predictive tool that has withstood the test of time. The planets are the delivery system for the universal energies of evolution. What that means is we're here on Earth to evolve, and what motivates us, what pushes and prods us to grow, are the universal energies that are delivered to us through the planets.

Remarkable and Uncommon Events

Four major evolutionary cycles are shifting

- 1. Round Change**
- 2. Age Change**
- 3. Earth Change**
- 4. The Great Mutation**

Those of you who have attended my workshops in the past know that what's happening right now is remarkable and uncommon. Four major evolutionary cycles are shifting at the same time. This is unprecedented. We have a Round Change underway, an Age Change, Earth Change, and the Great Mutation.

Round Change: Eons

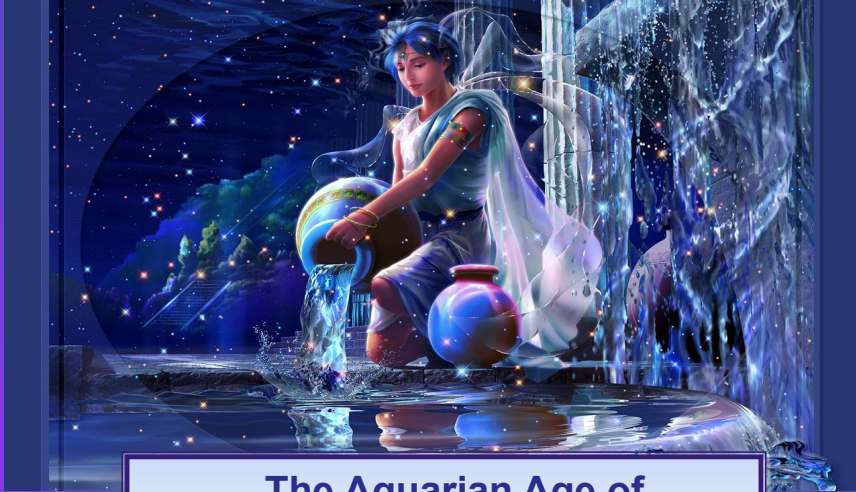

1	7	1 st & 7 th GLOBE	The Archetypal Plane
2	6	2 nd & 6 th GLOBE	The Intellectual (or Creative) Plane
3	5	3 rd & 5 th GLOBE	The Substantial (or Formative) Plane
	4	4 th GLOBE (ours)	The Physical (or Material) Plane

Let's take a look at the Round Change. Rounds take eons of time to unfold. Wisdom Teachings explain that evolution unfolds in seven stages called Rounds, and each Round is millions of years, if not billions of years long. They indicate an evolutionary leap. In the beginning, we were all one, and then something like the Big Bang happened, which set the Rounds into motion. In the first Round, we became individual souls. As we descended through the first three Rounds, we existed solely in the Light Body. It is said that in the first three Rounds we became aware of our senses, we learned to communicate, and learned to interact with our environment. In the fourth Round we manifested into physical form in the physical or manifest world, and that's where we're at now.

We know that at the end of the third Round and the beginning of the fourth Round was the time of Lemuria. We existed in the Light Body, and could travel to and from the Earth at will. Now we're fully in the fourth Round and for a variety of reasons, are sort of stuck here. But what's really important about now is that we're beginning the ascension. We're beginning to return back Home. We're in the process of moving from the fourth to the fifth Round. Why is this important? Because we're closer to the Light Body - with experience now - because we've been through the experiences and growth of the first three Rounds and continue to grow in experience while in the fourth Round. We are returning home more fully actualized than in our descent into matter. Now, we're closer to the Light Body with all of our experience than ever before. That's

why the veil between this side and the other side is lifting. It's becoming increasingly easier for us to communicate with our high self and with those on the inner plane.

Age Change: 2600 years

The Aquarian Age of Enlightenment and Peace

The next cycle unfolding is the Age Change. Each Age takes place over 2600 years of time. We moved from the Piscean Age to the Aquarian Age over the last 20 years or so. In the Piscean Age, we were taught that God was outside of us. In the Aquarian Age, we learn God lives within us. In the Piscean Age we learned discipline through fear of punishment. In the Aquarian Age, we're taught through love. Pisces was the age of martyrdom, and the teaching, I am not worthy. In the Aquarian Age is recognition of our power as co-creators. The Aquarian Age is the age of brotherhood, sisterhood, enlightenment and peace. What has been decreed by the universe and what Julian said many, many times is that in this Aquarian Age, hatred will not be tolerated. Hatred will either self-destruct, be destroyed, or nature will intervene.

Let's explore how this might occur. An ice cube exists at a low vibrational frequency, and when it is exposed to the higher vibration of sunlight, it melts and evaporates. It cannot exist in the warmth of the sun. Hate exists at a low vibrational frequency. We know that at each solstice and equinox, our universe increases in vibrational energy. As the energy elevates, hatred cannot endure; it will dissipate, much like ice melts under the warmth of the sun.

Earth Change: 3000 years

Humanity functions by reason and intellect
Nature functions by intuition
Nature will do what it needs to self-perpetuate

This next cycle unfolding is the Earth Change. Every 3000 years or so, Earth undergoes upheavals necessary to re-establish and replenish itself. This is why we are now experiencing dramatic landscape and climate change. While humanity functions by reason and intellect, nature is the wiser through intuition. Nature is going to do what it needs to do in order to perpetuate itself. We can either help or hinder this process by our actions.

Great Mutation 150 - 200 years

Conjunction of Saturn and Jupiter

1842 - 2020 Saturn/Jupiter conjunct in Earth signs

Earth: Practical, grounded, the physical world, structure, wealth, possessions, land development, resources from earth

2021 - 2159 Saturn/Jupiter conjunct in Air signs

Air: Social, intellectual, collaboration, innovation, high tech advancements in communication, science, space exploration

The Saturn/Jupiter conjunction dipped into Air signs from 1980-2000, then returned to Earth signs until 2021 when it moved back into Air

In addition, these changes coincide with The Great Mutation. The Great Mutation occurs about every 150 to 200 years, and has to do with the alignment of two major planets, Jupiter and Saturn. Every 20 years, these two planets conjunct. What creates the Great Mutation is, over a 200 year period, they meet in signs of the same element - fire, air, water, earth - emphasizing the qualities of that element in our lives. The conjunction occurred in the earth signs between 1842 and the end of 2020. Earth is practical. It's grounded. It deals with the physical world and with structures. And so there's been a focus, and in fact, a high value placed on wealth, on possessions. There's been a focus on land development and resources extracted from the earth. But this focus astrologically changed in 2021 and we'll see it manifest over the next 150 years or so. Saturn and Jupiter conjoin in the air signs. This adds a whole different energy to our planet. Life as we know it is going to change. Air signs are social; they deal with the mental plane. They're intellectual. They deal with cooperation, collaboration, innovation. There will be increased focus on high tech advancements, particularly in communication, science and space exploration. And you know, all you have to do is look at what we're doing now in this meeting. New technologies like zoom have allowed us to communicate instantly with people worldwide.

So these four cyclical changes are forming the backdrop of our world. They're setting the stage to what Denise and I are going to talk about, what will unfold over the next couple of years.

Here's what I think is most important to remember about these changes. First and foremost, we're returning to the Light Body. So it's going to be easier and easier for you to make the conscious connection with your High Self and with other Divine Assistance. Second, we're moving deeper into the Aquarian Age and into the Jupiter/Saturn conjunction in Air signs. This means that despite appearances, humanity is moving towards a time of peace and cooperation. Also, we've got some major choices here on either helping or hindering earth to re-establish and replenish itself.

Unprecedented Change

Four major planets change signs in one year

Pluto: Capricorn to Aquarius 11/24 – 1/44

Neptune: Pisces to Aries 3/25 – 3/39

Uranus: Taurus to Gemini 7/25 – 5/33

Saturn: Pisces to Aries 5/25 – 4/28

Things are going to ramp up as four major planets change signs within a one year period of time. We astrologers have studied planetary configurations for about 3000 years, and we've never seen this happen before.

In November, 2024, Pluto, moved from Capricorn in to Aquarius. It's going to be there for 20 years; until January of 2044. In March, Neptune moves from Pisces to Aries. In July, Uranus will move from Taurus in to Gemini. And the quickest moving of these four is Saturn which will move from Pisces into Aries this spring.

Pluto: Lord of the Underworld

Volcanic power

**Brings up what's
below the surface**

**Reveals weaknesses
and strengths**

Death and rebirth

Transformation

Let's begin with Pluto. Pluto is called the Lord of the Underworld. I think Pluto functions like a volcano because it uncovers what's below the surface, and often in a dramatic way. It uncovers the poisons, the weaknesses, and that which has been hidden or repressed. Their unleashing seems to devastate and destroy. Consider how a mountainside looks after a volcano has erupted. It looks like a moonscape. But once the poisons and weaknesses are brought to the surface, and once we become aware of what we have repressed, change can take place.

Out of that volcanic eruption new nutrients are also brought to the surface. New life thrives, and the mountainside becomes lush with new growth. That's the same thing that happens with Pluto transits. They may create all kinds of disruption, but they also bring up incredible strengths and potentials to the surface. It's through those that we're able to transform our lives and our world. That's the energy of Pluto. It rules death and transformation.

Pluto Transforms

Libra	1972-1982	Relationships
Scorpio	1983-1995	Sex and sexuality
Sagittarius	1995-2008	Religion and spirituality
Capricorn	2008-2024	Structures - homes, government, infra-structures, autocratic power Rules old age, limits, restrictions Rights, freedom limited internationally

Here's some examples of how Pluto has transformed our world over the last few decades, Pluto entered the sign of Libra in the 70s, and Libra rules relationships. Historically, people remained in one marriage for their entire lives, regardless of how lousy that marriage was. But during Pluto's sojourn through Libra, it became more acceptable for people to divorce and remarry. There was a greater strive for fulfillment in relationships. And what went hand in hand with that? More women entering the workforce. This dramatically changed the dynamics at home because it began to even the playing field a little bit more. Any of you who are adults at the time of Pluto in Libra knows these changes didn't come about easily. They were highly disruptive. When people wanted to divorce their parents were ready to disown them. In fact, some parents did disown them. For the women who went to work, they had all kinds of flack about it - they were abandoning their children and such. It took a long time for these changes to develop and be accepted. But transform relationships, it did.

In the 80s, Pluto enter Scorpio. Among other things, Scorpio rules sex, death and the underbelly of things. Historically, sex was associated with pregnancy. But the advent of birth control in the 60s gave rise to the free love movement. That all changed when Pluto moved into Scorpio in the 80s, as the AIDS pandemic grew and associated sex with death. Sex took on a whole new meaning. In addition, we became more aware of sexual harrassment, sexual abuse, and sex trafficking - the darker side of sex. Our sexual awareness grew. And meanwhile, there was a burgeoning increase in sexually

charged media - Madonna's book called Sex along with highly sexualized movies and music. In fact, these spurred the beginning of explicit content labeling.

From 1995 until 2008, Pluto sojourned through Sagittarius, which rules religion and spirituality. This time was marked with mass exodus from churches due to the corruption of its leaders. Scandals related to embezzlement, and sexual abuse of minors was rampant. People were devastated by what was happening. Talk about the landscape being destroyed after these volcanic eruptions. But what was the end result? What grew from this was a great expansion in spirituality. This idea that we don't need to go through a minister or priest or rabbi to talk with God, We can turn inward and connect with God on our own. The phrase spiritual, but not religious, is born now.

Pluto entered the sign of Capricorn from 2008 and just left in November of 2024. So believe me, we're still reeling from it. Capricorn rules structures such as our homes and government, along with the infrastructure - roads, bridges and such. It also rules autocratic power and old age. Capricorn limits, it restricts. When Pluto first entered Capricorn in 2008, experienced the housing crisis devastation. We began questioning the basic structures in our country such as voting, the authority of the Supreme Court, the ability of Congress to function, even our very constitution. This disruption is mirrored around the world as rights and freedoms are being limited. Why? Because Pluto's desire for control permeated Capricorn's rulership of government. We're not going to see the full impact of this transit for some time.

Aquarius

Streams of New Thoughts

Air, Fixed, “I Know”

Shadow: Rigid opinions, know-it-all attitude, aloof

Youth, freedom and equality

Intellect, technology, innovation

That which is new, unusual – expect the unexpected

Pluto sojourns through Aquarius from 2024 - 2044. Aquarius deals with streams of new thought. It's an Air sign, fixed with the key phrase, “I Know”. The shadow side of Aquarius is having very rigid opinions, a know-it-all attitude, being aloof, detached, and removed from emotions. While Capricorn dealt with old age limits, structures, Aquarius deals with youth, freedom, and equality. It's an intellectual sign. It has to do with the mental plane. It deals with technology, the future, innovation, and that which is new and unusual.

Pluto in Aquarius 1778-1798

French Revolution American Revolution 1775 - 1783
US Constitution: 1787 Bill of Rights: 1798
Freedom, rights, equality fought for and gained
Air travel began: First hot air balloon launched
Uranus discovered, expands boundaries of solar system
1543 Copernicus discovers a heliocentric solar system
Dramatic change in world view

Pluto hasn't been in Aquarius for 248 years. We can only speculate what it will do this time around, but we can look at what's happened in the past. Pluto was last in Aquarius between 1778 and 1798, and during that time, the French revolution occurred. This is when people overtook the French monarchy. In fact, they executed the king and strengthened the middle class. We also had the American Revolution, where we removed ourselves from the British monarchy. The law of our land, the US Constitution was developed as was the Bill of Rights which guarantees certain basic rights to all US citizens. We see that during this time freedom, rights, and equality were fought for and gained.

Aquarius is an Air sign. This is when air travel was initiated. The first hot air balloon was launched. New ideas about the universe took root with the discovery of Uranus, which expanded our understanding of the solar system. In fact, when Pluto entered Aquarius the time before this, Copernicus discovered that the sun was the center of our solar system. This was blasphemous. In fact, it wasn't even accepted for about 100 years.

Pluto in Aquarius dramatically changes our worldview.

Pluto in Aquarius

11/24 – 1/44

Advances in technology accelerate

AI, data mining, genetic engineering, medicine

Technology and information wars, not physical

Need for ethics to keep pace with advancements

Energy sourced from air and innovative sources

Focus from 'me' to 'we' consciousness

What can we expect this time around - tremendous advancements in technology, AI will gain in sophistication beyond what we can even imagine, data mining, with all of its benefits and its problems expands. Expect major breakthroughs genetic engineering and medicine in general. Our battles will shift from physical combat on the ground to technologically driven warfare. We'll see energy sourced from air, and because Aquarius rules innovation, other groundbreaking energy sources will be discovered.

With technology advancing so rapidly, it will be critical for us to ethically keep pace. And Julian said repeatedly that what's happening now is parallel to what happened during the times of Atlantis. In Atlantis, ethics didn't keep pace with technology, and destruction ensued. We don't have to let that happen again.

Pluto in Aquarius

Activism for freedom and equal rights

Groups confront misuse of power and control

Concern for the collective

Move from aged leaders to innovative youth

Attempts to hold onto power & the past with fury

James Webb telescope brings new universal view

Expect global recognition of our galactic family

The other important change we'll see is a move in focus from concerns about me and mine to ours. Along with increased activism for equal rights. We can expect groups getting together to confront misuse of power and control, as well as a greater concern for the collective. Rather than a focus on me, my family, my country, expect a more global perspective to emerge. There will be increase in activism for freedom and equal rights. Groups will join together to confront misuse of power and control. We're going to move from aged leaders to innovative youth.

We're now seeing attempts to hold on to power and the past with fury. As Julian often said, evolution will occur. We are all going to move forward, some kicking and screaming, but we're all moving there.

Regarding a new worldview, the James Webb Telescope is opening a whole new perspective of the universe to us. What I've said time and again - expect global recognition of our space brothers and sisters. Expect international contact in a peaceful manner. We're going to realize that we are very much a part of a galactic family, and this is going to completely change our perspective. Rather than seeing stark different differences between races, religions, sexual orientation, and cultures, we'll realize that we're all human beings. And we have 20 years for all this to unfold, and so shall it be.

Now, Denise will share her perspectives on the changes taking place with Neptune and Uranus.

Neptune

Pisces to Aries

March 2025 - March 2039

Thanks Camille! Great information! We are blessed to be living in such interesting times.

Let's take a look at the changes we'll be experiencing with Neptune moving from Pisces into Aries. Neptune takes approximately 14 years to transit each sign, and it will be in Aries from March of this year through March of 2039.

First, Let's look at the energy of the planet, Neptune.

Neptune: The Dissolver

Inspiration and creativity
Intuition and psychic abilities
Spirituality and mysticism
Compassion and empathy
Dreams and imagination
Healing and purification
**Illusion, deception, escapism
and addiction**

Neptune is known as the Dissolver. It dissolves ego boundaries, outdated beliefs and the lines between reality and fantasy. This quality of Neptune is seen as both challenging and potentially transformative.

- Inspiration and creativity — Neptune governs inspiration, creativity and artistic expression... all forms of art such as film, dance, music, painting, and poetry.
- Intuition and psychic abilities — This planet enhances intuition, making people more sensitive to subtle energies and psychic abilities.
- Spirituality and mysticism — It rules spiritual development and mysticism, connecting you to a sense of oneness and higher purpose.
- Compassion and empathy — Those influenced by Neptune tend to be deeply compassionate, empathetic, forgiving, and kind-hearted.
- Dreams and imagination — Neptune governs the realm of imagination, dreams, fantasies, and the subconscious mind.
- Healing and purification — It's linked to healing, purification and cleansing... physically and spiritually.
- Illusion, deception, escapism and addiction — Be aware, the influence of Neptune can lead to confusion, deception, and the desire to escape reality. It can be a two-edged sword...the desire to escape reality can manifest positively through spiritual pursuits or negatively through addictive behaviors.

Because Neptune will be moving into Aries, next I'll discuss the energies associated with the sign of Aries.

Aries the Ram

Fire, Cardinal, “I Am”
Courageous and bold
Passionate, action-oriented
Direct, focused, determined
Independent, optimistic
Aggressive, quick tempered, impatient

Aries is a Cardinal Fire Sign, and the key words are “I Am”. The cardinal signs signify the start of a new season... in this case Spring, and are known for initiating change, leadership and action.

The main qualities for Aries include:

- Being Courageous and bold
- Passionate, action-oriented
- Direct, focused, determined
- Independent and optimistic
- The shadow side of Aries qualities include...being aggressive, quick tempered, and impatient

Neptune in Aries

3/25 - 3/39

Spiritual Awakening

Creative Inspiration

Impulsive Action

**Technological Advancements
in Arts, Virtual Reality**

Combining the energies of the planet Neptune with the sign of Aries, here are some of the influences we might expect during this 14-year transit.

- **Spiritual Awakening**
 - This transit encourages a surge in spiritual exploration and self-discovery. It could lead to new philosophical concepts and spiritual movements.
- **Creative Inspiration**
 - Individuals may feel heightened creativity and a strong urge to turn their visions into reality.
 - You may be inspired seeing a strong connection between your spiritual experiences and artistic expression
- **Impulsive Action**
 - The combination of Neptune's idealism with Aries' impulsiveness could lead to both innovative breakthroughs and potential conflict.
- **Technological Advancement in Arts, Virtual Reality**
 - We'll most likely see developments in the arts and virtual reality.

As Neptune moves through Aries, it's important to balance Neptune's spiritual nature & idealistic visions with Aries' passionate, focused energy. This can create a powerful synergy for collective as well as personal growth and achievement.

Next, let's shift gears and talk about another significant change coming up this year... Uranus moving from the sign of Taurus into Gemini....

Uranus

Taurus to Gemini

July 2025 - May 2033

We will experience Uranus moving from Taurus into Gemini beginning in July. Uranus takes approximately 7 years to transit each sign and will be in Gemini from this July until May of 2033.

I'm going to break it down like this..

1. First, I'll discuss the energies of the planet Uranus.
2. Then, because Uranus is currently in the sign of Taurus, I'll review what we have experienced with Uranus in Taurus since 2019.
3. Next, we'll review the qualities of the sign of Gemini.
4. And finally, I'll combine the qualities of Uranus and Gemini so we can understand what energies are present in the upcoming cycle.

Here's a look at the planet Uranus....

Uranus: The Great Awakener

Unexpected Changes
Rebellion & Independence
Innovation & Creativity
Social Movements
Personal Transformation

Uranus, often referred to as “The Great Awakener”, is known for its association with sudden change, rebellion and innovation. This characterization stems from its role in inspiring individuals and societies to evolve by challenging the status quo and embracing new ideas.

- **Unexpected Changes**
- **Rebellion & Independence**
 - Uranus embodies a strong impulse for rebellion and independence, often leading to unexpected changes that can be shocking yet liberating. It is known for overturning traditional or outdated structures that no longer serve their purpose.
- **Innovation & Creativity**
 - The planet is linked to innovation, creativity, scientific genius and technological advancements. It encourages a break from conventional thinking promoting unique approaches to problem-solving.
- **Social Movements**
 - It governs social movements and humanitarian efforts, reflecting its influence on the betterment of mankind.
 - Uranus also emphasizes the importance of community and collaboration.
- **Personal Transformation**
 - It serves as a catalyst for personal growth and transformation.

Now, let's look at what Uranus has been up to in the sign of Taurus...

Uranus in Taurus 2019-2025

Economic Fluctuations
Environmental Change
Global Value Shifts
Disruption of Stability
Personal revelations leading to shift of self-worth & values

Uranus has been in the sign of Taurus since 2019 where it will remain through June. Uranus has brought significant changes and disruptions to those areas governed by Taurus:

- Economic Fluctuations — Uranus in Taurus has been shaking up traditional financial systems which has led to technological advancements in banking, cryptocurrency and economic structures.
- Environmental Change — This transit has been influencing sustainability, food production, and our stewardship of the earth.
- Global Value Shifts — Our personal as well as collective values have been challenged and redefined during this period.
- Disruption of Stability — Taurus craves stability and Uranus brings sudden, unexpected changes. The tension created with these two energies has disrupted global and personal stability.
- Personal revelations have led to shifts in self-worth & our individual values

Uranus in Taurus has been impacting our material world, financial systems and values since 2019. Its move into Gemini this July will redirect this transformative energy toward communication, technology and ideas.

Let's take a look at the energies associated with Gemini....

Gemini the Twins

Air, Mutable, “I Think”

**Quick, versatile, social,
adaptable, communicative**

**Expressive, imaginative,
analytical**

Represents the conscious mind

**Dual forces: the opposition of
the human & divine in all of us**

**Indecisive, inconsistent,
irritable, nervous**

Gemini is a Mutable Air Sign, and the key words are “I Think”. The mutable signs signify the end of each season and are known for flexibility and versatility.

The main qualities of Gemini include:

- Quick, versatile, social, adaptable, communicative
- Expressive, imaginative, analytical
- Represents the conscious mind
- Dual forces: the opposition of the human & divine in all of us
- The shadow qualities of Gemini are being Indecisive, inconsistent, sometimes irritable and nervous

We talked about the energies of planet Uranus and just reviewed the sign of Gemini; so let's combine the two....

Uranus in Gemini

7/25 - 5/33

Communication Revolution

Intellectual Breakthroughs

Social Change

Global Restructuring

Personal Transformation

Uranus will enter Gemini in early July marking the beginning of a transit that will last until 2033. This planetary shift represents a period of radical change, innovation and revolution, specifically in the areas related to communication, technology and social norms.

- **Communication Revolution** — Expect groundbreaking changes in how we communicate and exchange information, with new technologies and platforms likely to emerge. We are already seeing a huge upsurge in the use of AI.
- **Intellectual Breakthroughs** — This transit may stimulate curiosity and lead to significant advancements in science, education, learning methodologies and technology.
- **Social Change** — With the increase of social activism and movements, we will see a challenge of traditional social norms, focusing on diversity and freedom of expression.
- **Global Restructuring** — There may be potential reshaping of national borders and regional divisions. We could also see radical restructuring in the travel and tourism industries.
- **Personal Transformation** — You will notice changes in how you think and communicate, exploring new ideas and learning new things.

This Uranus in Gemini transit promises to bring in a period of both...significant upheaval and innovation.

Historical Events - Uranus in Gemini

Transit Dates	Event Dates	Event
1690-1697	1691	Birth of post office in American Colonies
1774-1782	1775-1783	American Revolutionary War
	1776	Signing of Declaration of Independence
1858-1866	1854-1866	Transatlantic communication cable laid
	1861-1865	American Civil War
1941-1948	1939-1945	World War II
	1942	Development of first computers and algorithms for code breaking

It takes Uranus 84 years to transit the 12 signs of the zodiac. This chart shows a few of the significant events that happened during the last four transits of Uranus in Gemini.

(See the event date & event from the Historical Events slide)

While astrology is not deterministic, historical patterns suggest that Uranus in Gemini aligns with times of intellectual, technological and societal upheaval which can include war. That doesn't have to be what we experience in this upcoming cycle. We are meant to learn from the past.

It's important to remember as light workers, we can focus the energy on peace and positive change. We are each responsible as that change begins within.

Let's take a look at Saturn in Aries... Camille....

Saturn

Pisces to Aries

May 2025 - April 2028

That was wonderful, Denise. What a lot of information you packed in. And yes, many exciting changes are coming.

From May 2025 to April of 2028, Saturn will move from Pisces into Aries.

Saturn The Great Teacher and Manifestor

Gives birth in the physical to our thoughts, words, actions
Limits, restricts, the thought into form at its proper time
Provides the lessons we need to grow and understand

Saturn is considered the great teacher because it gives birth in the physical world to our thoughts, words and actions. When you go to see an astrologer, one of the things they're going to look at right away is what Saturn is activating in your chart. Saturn tells us what's going on in your everyday world, whereas Pluto, Neptune, Uranus, form foundational energies.

Saturn has to do with karma; with the law of cause and effect. Saturn is the energy that brings manifestation to your ideas. Say you decide to manifest a new car. It will manifest in the physical world as result of Saturn. Saturn brings form to that idea and because Saturn limits, and restricts, it will bring that form into physical manifestation in its proper time. Because of that, Saturn is considered the great teacher. You reap what you've sown; you experience the results of your behaviors and thoughts. Saturn provides the lessons we need to grow and understand.

Saturn in Pisces 3/23 - 5/25

Desire for time alone, contemplation, reflection

Closure, endings to make way for the new

Urge to increase our spiritual foundation

Focus on alcohol/drug use: Rx and reduce/eliminate

Issues surrounding water: lead and PFAS, flooding

Deep resonance with the arts and nature

Call to discern what is truth/real and what isn't

Saturn has been in Pisces from March 2023 through May 2025. If you look back over these last couple of years, we moved from COVID isolation to a desire to socialize again. But there's still been a lingering desire for time alone. There's a draw towards contemplation and reflection.

This has also been a time of closure and endings. Some of those endings may be difficult, but they need to happen to make way for the new. During this time, many have felt an urge for spiritual development; an urge to learn about the spiritual component in their lives. In addition, there has been a focus on alcohol and drug use – both ruled by Pisces - in terms of treatment and programs. A lot of people are choosing to reduce these in their lives. Some, even to eliminate them.

Pisces is a water sign, so issues around water have been manifest. Efforts have been made to clean water from lead and PFAS. Climate change has been very much resulting in flooding. Now, of course, with all the planets beginning to touch the fire signs, we're seeing more fires. Yet issues of water dominate.

Pisces ruling the arts and nature. There's a deep resonance, a deep healing that takes place when we engage in the arts and spend time in nature.

As Denise said, Pisces is ruled by Neptune, which rules deceit and untruths. Saturn in Pisces says, heads up. You've got to discern what's real and what isn't. Don't just believe what you see and hear.

Between Now and Spring

Wrap up and release what you no longer need

Incorporate music, the arts, nature to heal & recharge

Hone your spiritual routine and practices

Create a firm foundation for the launching to come

Ready yourself for the changing times ahead

These energies continue through May, so between now and spring, there are a few things I recommend. First, wrap up and release what you no longer need. That includes going through your house and letting go of possessions, but also looking at your commitments. Maybe some don't resonate with you anymore. Perhaps there are relationships that are best released now. Maybe there are some behaviors or habits you want to let go of.

This is a wonderful time for self-healing, to nurture and recharge yourself. Because of the Piscean energies now, spending time with music, the arts, and getting out in nature can be very healing and restorative.

This is a wonderful time to continue to hone those spiritual routines and practices, deepening those practices. It's important to create a firm foundation now, as lots of new beginnings are on the way. Changing times are going to be coming. We've can ready ourselves for the times ahead when Saturn moves into Aries.

Aries the Ram

Fire, Cardinal, "I Am"
Courageous and bold
Driven and action-oriented
Direct, focused, determined
Independent, self-sufficient
Competitive and ambitious
Quick tempered, impatient

Aries is represented by the ram. It's courageous, bold and driven. Aries is action oriented. It pushes forward - the pioneer. Aries is independent, self-sufficient, ambitious, and competitive. Its darker side includes being impulsive, quick tempered and impatient.

Saturn in Aries 5/25 – 4/28

Time to manifest self-reliance, self-sufficiency

Assist others' independence with love and support

Universal push to strengthen self before group work

What do you need for fulfillment? Wholeness?

Bolsters courage and determination to pursue goals

New careers, projects, hobbies, and interests

What we can expect with Saturn moving into Aries from May, 2025 – April, 2028. This will be a complete shift in energies. Pisces is very different from Aries. We'll experience a push to manifest self-reliance and self-sufficiency. We will learn who and what we have become overly dependent. It's time to break free.

We will become aware of who has become overly dependent on us. I'm not saying it wasn't necessary to help them in the past, but this is an important time to assist other people to gain their independence. Not through sternness or saying, I'm done with you, but through love and support, through encouraging them. To say, I believe in you.

There will be a universal push to strengthen the self. I've talked about the Aquarian energy of humanitarianism, cooperation, collaboration, group work, and group activism. All that's true, but friends, we've got three years to get our personal acts together. To say to ourselves, what do I need to be whole? We can't do the group any good if we come in broken. We've got three years to take strengthen ourselves. This isn't to say we should all become selfish, but it's time to focus on yourself, and your needs. To ask yourself, What do I need for my fulfillment? What do I need for my wholeness?

These are questions to ask ourselves and for our loved ones to ask themselves. Encourage others to boldly move forward towards their fulfillment. Know this time

bolsters courage, and it provides internal determination to pursue goals.

Aries is the first sign of the zodiac, and it's all about new behaviors, new careers, new projects, new hobbies and new interests. This is a wonderful time to begin the new; you just need to take some time of self-reflection to determine where to begin.

Saturn in Aries 5/25 – 4/28

Check self-centered, me-first, hot-headed behavior

Patience, disciplined plans and actions achieve results

Can foster grounded, healthy self-esteem & confidence

Focus on physical fitness and vitality

The more you put into it, the greater the results

There is a shadow side to Saturn. We've got to check self-centered, arrogant, and aggressive behavior. Aries rules war and warlike behavior. We have to stem divisiveness within and outside of ourselves.

Saturn rules plans and structures, it asks us to use patience and discipline, and with those, we can achieve our plans. Just don't be impulsive about it. Give it some thought.

This is an incredible opportunity to foster grounded, healthy self esteem and confidence in yourself and in others. Also, Aries can generate vitality, and powerful, outgoing energy. So this is a great time to focus on your fitness. It's a great time to initiate new activities, to change your eating and drinking patterns. With a little bit of discipline, great strides can be made. But remember it's not going to be as difficult to muster self discipline in these areas. There will be an internal drive to help move you forward. And the more you recognize, and work with it, the greater the results are going to be.

2025 + Seek Opportunities for Positive Change

Over the next couple of years, especially 2025 through 2028, seek opportunities for positive change.

Courageously Navigate the Rapids

**Expect rapid changes
internally and externally**

**Rise above the turbulence
to clear skies**

**Ground yourself often
Enter the Silence daily**

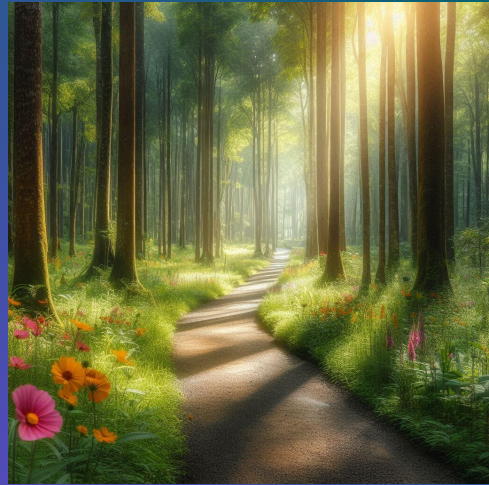

This is a time to courageously navigate the rapids. This is why I chose this image, because we can expect rapid changes taking place externally and internally. Things can become really chaotic. Expect the energies of oo, go, go, change, change, change. Although it may be chaotic at one level, we don't have to live at that level. Think about an airplane that rises above the clouds. And when it rises above the clouds, it enters clear blue skies. We can do this energetically. We can rise above the turbulence to view things from a higher perspective, and can then act from the higher perspective. I believe this will be critical for our well-being and for the planet.

Grounding techniques are going to be imperative. Some of those might be breath work or mindfulness exercises, or getting out in nature. Whatever works for you. And above all, turn inward and enter the silence for the guidance, the understanding the the inspiration you need. Enter that silence daily because it's going to help you cope; it can help your thrive now.

Boldly Create the New

**Imagine the possibilities
This is the time to begin it
...with a plan of action**

**Our external world
reflects our inner world
Balance is the key**

**Weave a pattern of
change that is
positive and good**

This is a time to boldly create the new. Don't limit yourself. Follow that new path with courage. I recommend that you image possibilities and then create a plan of action, because in these next few years, this is the time to begin it, whatever it is. As long as you have that plan. And we all have to remember that while we're forging forward with these new plans and new goals, etc, our external world is going to be a reflection of our inner world. So it's going to be important that we strive for balance in all things.

I know that many of us are grappling with what's going on externally now, but we have to remember that we can't transform what we're not aware of. And I see this as great opportunity. I see this as a great call to action for us to function from a higher vibration. We know we've got all the assistance we need. We're closer to the Light Body than ever before. We've got all the assistance we need from our high self and from the companions of the Light to weave a pattern of change that's good and positive. Denise?

Trust, Acceptance and Flexibility

**When you align yourself
with the Divine
all things are possible**

Thank you, Camille. Such important wisdom to help guide our daily life. With the dramatic changes taking place this year, it's so important to focus on Trust, Acceptance and Flexibility.

When you align yourself with the Divine all things are possible

United We Create a Future of Light

United, we create a future of light. I think that's the most profound slide to end and conclude this presentation because it really reflects the work that we do as light bearers. That image is what I picture every time I do a healing meditation.

We'd like to open it up to questions now, but if anyone needs to leave feel free. The link to the presentation, including the question-and-answer period will be emailed to everyone who received the zoom link.

Questions, Answers and Comments...

Robin 1:00:12

In terms of climate change over the next five years, what do you think we can expect, as far as what we're used to, or maybe what we're not used to moving forward.

Denise Hall 1:00:50

Camille shared that we're in this round of the Earth changes. Part of the climate change story is related to mankind's use of the planet, what's happening with petroleum and all of our other resources. However, the climate change also has to do with the Earth changes that are necessary for the continuation of Mother Earth. Every 3000 years, the earth goes through this cycle. Certain areas are meant to become more arid and dry, and other areas are meant to get more water. Part of the challenge is mankind paying attention and not continuing to rebuild where there's a flood or fire, etc. There's going to be a shift. For example, we have found seashells and proof of sea creatures in the deserts and mountains which tell us that in the past, those areas were at one time under water.. I don't know if these current earth changes have peaked, but I believe we will continue to see major earth changes in this decade. Would you like to add to that, Camille?

Camille Albrecht 1:02:18

You're right, Denise, well said. And Robin, you know the change begins with us, right? What are we doing in our homes, in our communities and in our backyards? The earth is going to sustain itself. It's going to do what it has to do. And we can either help it or we can hinder it. Being aware of what we're doing and what the ramifications are will

make a big difference. From my perspective, I think we're going to continue to see major Earth changes until we wake up and begin to take care of her more.

Larry Scheer 1:03:06

I remember we asked Julian once, when will the Earth changes stabilize? And he actually gave 2025, as the year. But I agree with you, it's probably up to how we're behaving on the planet.

Camille Albrecht 1:03:20

I hinge my hope on our moving from the fourth to the fifth Round, moving further towards the Light Body because there's so much guidance to be had from our High Self and our companions of the Light.

Denise Hall 1:03:55

Yes, our individual efforts do make a difference on the collective. Ask yourself, how much plastic am I bringing into the house and how is that being recycled? Just take as much responsibility as you can for all the areas that can help.

Grace 1:04:24

Yes, thank you for this presentation. It was very rich and gave us a lot of courage and hope. I was very much struck when you said at the beginning about the great mutation, and the last great mutation began in 2021, just after COVID. Because of COVID we can be on Zoom. COVID forced us to zoom. So it is all on the same synchronicity.

Camille Albrecht 1:05:22

Very true, Grace.

Carol Nicholas 1:05:30

I want to say thank you. Everything you've said today makes sense to me. I just went through major surgeries. This meeting really hit home and gave me a great environment for healing, to move on. I appreciate being able to keep in touch with the community. I like that we can share our ideas and show that we care for the universe. Thank you.

Jan Clayton 1:06:35

Question from Fran, Have either of you done work with these changes in the US birth chart?

Camille Albrecht 1:06:49

planets interact), plus the North and South Node changes taking place in the spring.

Larry Scheer 1:08:18

So, Camille, you mentioned, we're focusing on our values and we're trying to find our values, but a lot of divisiveness in this country is based on values. We have groups of people who their values are not inclusive, and they're very strict. We don't have freedom from religion. There's this movement in the country that wants to put a particular set of values and apply it across the board to everybody, and it doesn't fit for some folks. If you say I'm spiritual, but not religious, that just blows the minds of a lot of people.

Camille Albrecht 1:09:03

With the movement of Pluto and Uranus into the air signs, cooperation will become a greater focus. As hard as it may be to believe, we're moving from a time of divisiveness into a time of cooperation and collaboration. In fact, I just received a request on Facebook to join a non- partisan group that wants to discuss politics in order to find common ground. And I think that's where it starts, grassroots kinds of things.

Larry Scheer 1:10:01

Thank you. That's good input. And I do have one other question, and I'm looking for astrologers to answer this. We seem to be rewarding bad behavior. Bad behavior seems to be being rewarded now for a decade or so, and I'm looking for a point or two.

Camille Albrecht 1:10:43

Larry, I think what you're talking about here is this huge call for ethics, right? That's a big part of this. I believe wholeheartedly, just as we talked about with the environment, it starts with us. I have found myself being more demonstrative, smiling at strangers more, opening door more, demonstrating small kindnesses more. And I've noticed other people being kinder, too. Once again, it begins at the grassroots level. Remember what Julian said, we are going to evolve to the Age of Enlightenment and peace, some kicking and screaming, but we're all going there.

Sheila 1:11:52

What do you see about health and discoveries about cures for all kinds of diseases that have been around forever? People are living longer, and so there's a lot of suffering from these same diseases. What do you see about advancement in that area?

Denise Hall 1:12:17

medicine fixes on it, this is another change in perspective that may start to integrate into social norms, become more normal thinking. We may take more of a holistic viewpoint in how we approach our health. This is something that could certainly manifest with the energies that are unfolding. Astrology isn't predictive in its nature. These energies are presented to mankind, and they choose to use them how they see fit. How beneficial it's going to be will depend upon mankind. Sometimes a cure is found and it's blocked because there's no money to be made. Each of us individually must own our integrity. There will be groups and people fighting for the right solutions to come to light.

Grace 1:14:45

Yes, just because I am not American, but I was stuck when you said about the return of Saturn in United States chart, and you spoke about the earth resources. But the problem is that Trump has said that he will dig and dig and dig for Gaza and petrol.

Camille Albrecht 1:15:15

It's true. Grace. But with so much of what we're now seeing, it's short lived. That's one of the reasons Denise and I wanted to share this today. The energies of change are upon us. This old guard is not going to be able to sustain now. With Pluto in Aquarius, we've got over 20 years for these changes to unfold. Resources are going to be coming from the air, there's no doubt about it, but you're going to see certain people that will fight like the devil to keep it the old way. But it cannot be sustained. We trust that the old ways can't be sustained.

Denise Hall 1:15:58

Remember, we're just on the cusp of the Aquarian Age. This 2800 year cycle of Aquarius is ruled by polarities. And so at the beginning of the age we're going to see these extreme opposites surface. The purpose of this age is to bring it into balance. If it doesn't come to the surface, and we're not aware of it, we don't know what we need to bring into balance. And so as each of us brings that balance into ourselves, as each of us finds the balance and continues to work with the light, that energy of light and love and balance bleeds into the cosmos. This ocean of energy, that is who we are, and it starts to affect a greater and greater amount of people. Even if we're not touching them individually, the energy goes out and makes a difference. And there is a movement of conscious awareness and raising your vibration and staying in a center of love. We don't hear about it in the news and the media. They focus on the negative. But it's happening, and it's who we represent. If we tune into that energy and join forces with that light, it makes a huge difference. That's what's going to create the positive change that we're talking about. That's the direction we want to focus on. Going forward, we may see something in the outer world that is totally

light, because that's our greatest power.

Jan Clayton 1:18:11

I think that's all we have time for today. We had an amazing audience of about 79 people. Thank you all for coming. We really appreciate it.

Multiple Participants

Thank you!
